Deficiency Plan of Correction	Date to be completed
Upon arrival on 9/9/26, five children in the three- and four-year-old class were not supervised at all time on the playground., Ad Hoc Plan of Action - On September 9, 2026, it was reported upon arrival that five children in the three- and four-year-old classroom were not supervised at all time while on the playground. Upon reviewing the camera footage, it was determined that the children were, in fact, supervised by staff at all times while on the playground. The staff member was positioned near the playground door and remained with the children throughout the outdoor play period. Due to the staff member's position in front of the door, their presence and supervision may not have been clearly visible to individuals entering the facility. However, the camera footage confirms that staff maintained supervision of the children at all times. As a corrective measure, staff will be reminded that supervision should be clearly observable and that staff positioning should allow their presence to be readily visible to incoming traffic while continuing to maintain active supervision of all children. Management will continue to monitor staff positioning and supervision practices to ensure compliance with supervision requirements.	9/9/2026
